

CDE Partners with Castles to Provide Contactless EMV Solutions

CDE, the payment industry's leader in customized POS support solutions, has recently partnered with Castles Technology Co, Ltd. Together, they will provide merchants in the United States access to secure and innovative devices like the PaySaber MP200, and other affordable EMV-ready solutions. CDE's P2PE capabilities make them the ideal partner for providing the industry's latest in security and convenience with Castles' POS equipment.

CDE's tailored solutions and focus on excellent customer service make them the ideal partner to deliver point of sale solutions. CDE is pairing their unique capabilities with Castles' innovative technology to encourage the adoption of more user friendly devices that are equipped to achieve PCI compliance.

"We're pleased to partner with a company so dedicated to customer success," says Winston Fong, Chief Strategy Officer at Castles. "CDE's end to end distribution and unique service offerings will be a tremendous benefit to our customers and help continue the transition to EMV."

Castles has continued to produce cutting edge, reliable, and secure payment processing equipment over the years. Now, CDE will distribute all of their available products, starting with the MP200 which includes chip, magstripe and contactless capabilities. The MP200 also includes USB, Bluetooth and WiFi communication options and will soon have added features like 3G and a signature capture touch screen.

"Castles has been a proven leader in delivering innovative solutions around the world. We are excited to partner with them as they introduce their impressive solutions into the US market," commented Randy Siebold, Vice President at CDE.

About CDE

CDE is an industry leader in asset management and support services for the quickly evolving POS and payments industry.
